

REMARKS

This preliminary amendment, which accompanies the filing of a new divisional application cancels claims 1-25 and 55-61 previously elected for prosecution in the parent application. The remaining claims 26-54 cover a non-elected invention and accordingly were withdrawn from prosecution in the parent application. It is believed that these claims recite patentable subject matter. Accordingly, the Examiner's consideration and allowance of the application is earnestly requested.

Respectfully submitted,

Richard L. Myers
